

# CMPT 767 – Visualization – Week 4 Journal – Tiles and Legos

Date: 01<sup>st</sup> October 2019

Name: Anurag Bejju (301369375)

**Inspiration:** This week I was inspired by the class activity and want to log some of the cool ideas showcased by my fellow classmates.

## Visualization 1

### Opinion

This is a fun lego formation done by me during the class activity. I really enjoyed reliving my childhood.

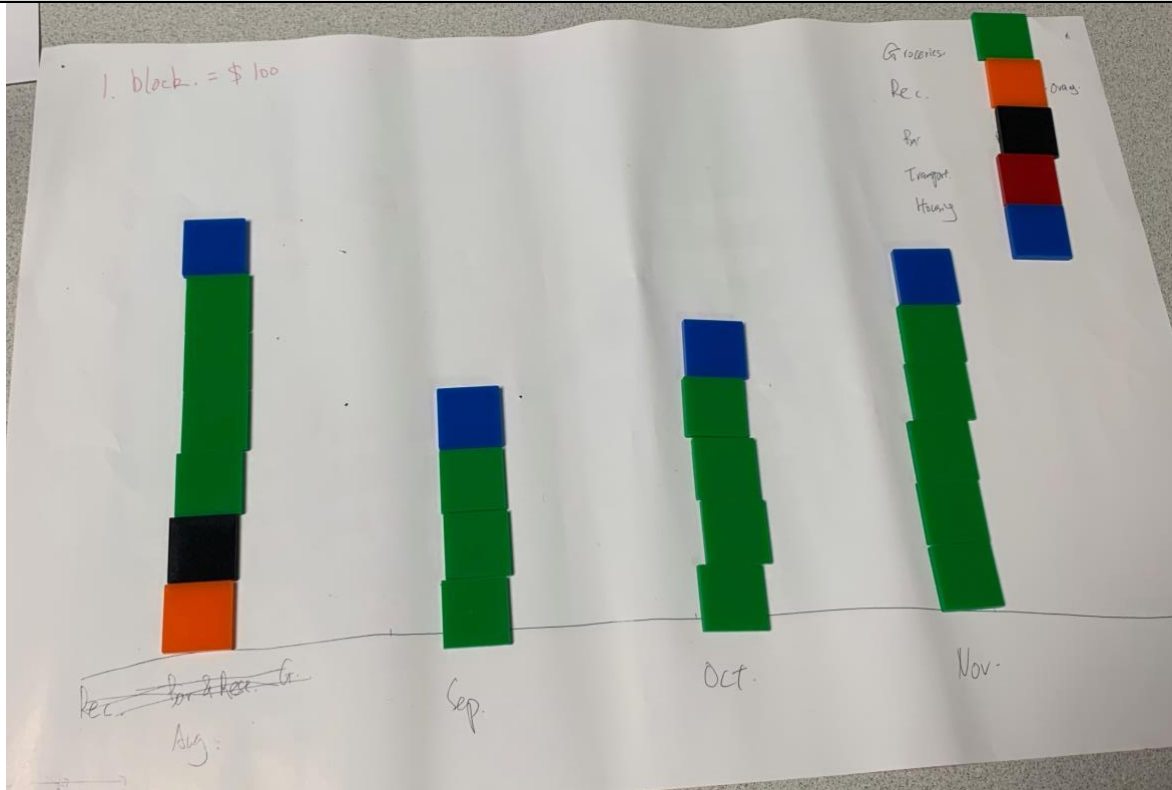

## Visualization 2

### Opinion

I really like this physical visualization that shows two different formations of the same data using tiles.

### Visualization 3

#### Opinion

I like this physical visualization as it uses tiles to create a stacked bar chart to represent the given data.

### Visualization 4

#### Opinion

This visualization was cool as it used quantity to represent the given data.

### Visualization 5

### Opinion

This three-dimension bar chart was pretty awesome and did a great job at representing the data.

### Visualization 6

### Opinion

I like the ingenuity behind this bar chart but can be a little difficult to see trends year wise.

## Visualization 7

### Opinion

This was another cool visualization that used tiles and showed two different ways to represent the same data.
